JENKINS-2

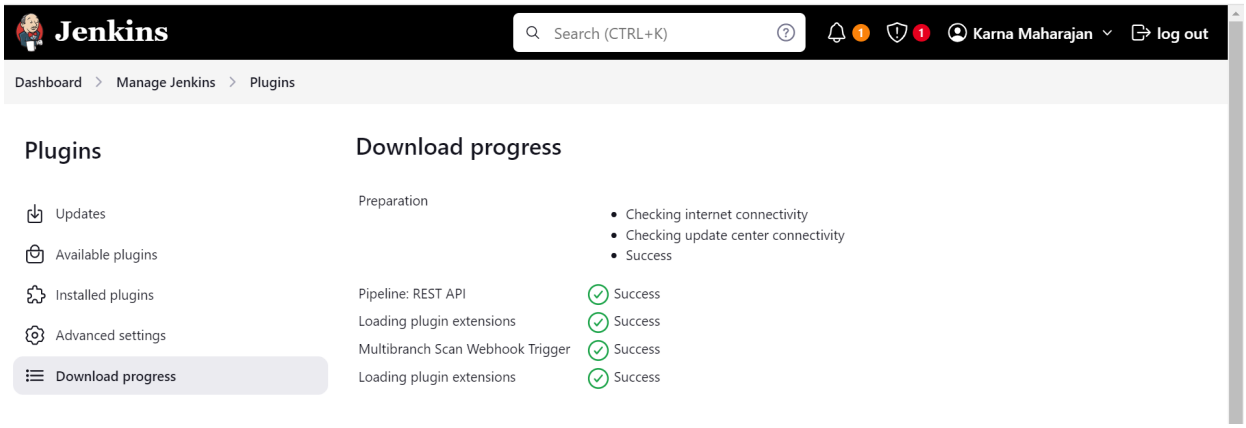
Task :7

Create a simple script file and push it to repo. Create a project in Jenkins connected to your GitHub repository. When a commit is made to your repo, automatically build must get triggered from Jenkins and the output must be shared to me via email.

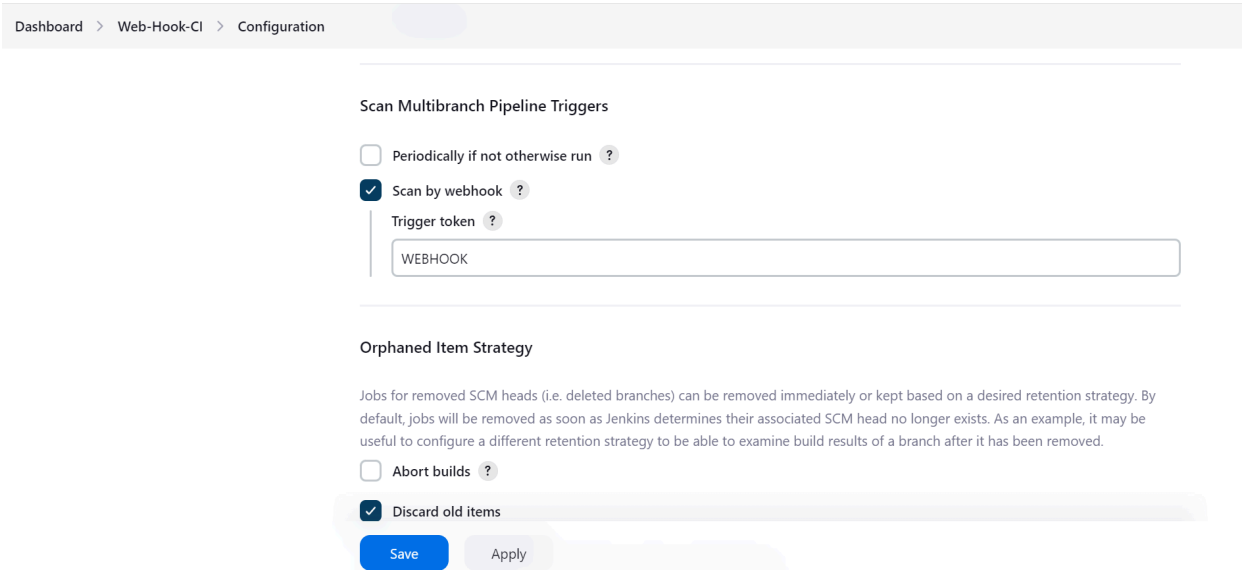
Create a simple script file and push it to repo.

```
karna@ubuntu-20:~/welcome-to-docker$ ls
Dockerfile  Jenkinsfile  MAINTAINERS.md  package.json  package-lock.json  public  README.md  src
karna@ubuntu-20:~/welcome-to-docker$ git re
rebase         reflog         remote         repack         replace        request-pull   reset          restore        revert
karna@ubuntu-20:~/welcome-to-docker$ git remote
origin
karna@ubuntu-20:~/welcome-to-docker$ git remote -v
origin  https://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@github.com/Karna2111/Docker-Project.git (fetch)
origin  https://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@github.com/Karna2111/Docker-Project.git (push)
karna@ubuntu-20:~/welcome-to-docker$ git push
Everything up-to-date
karna@ubuntu-20:~/welcome-to-docker$
```

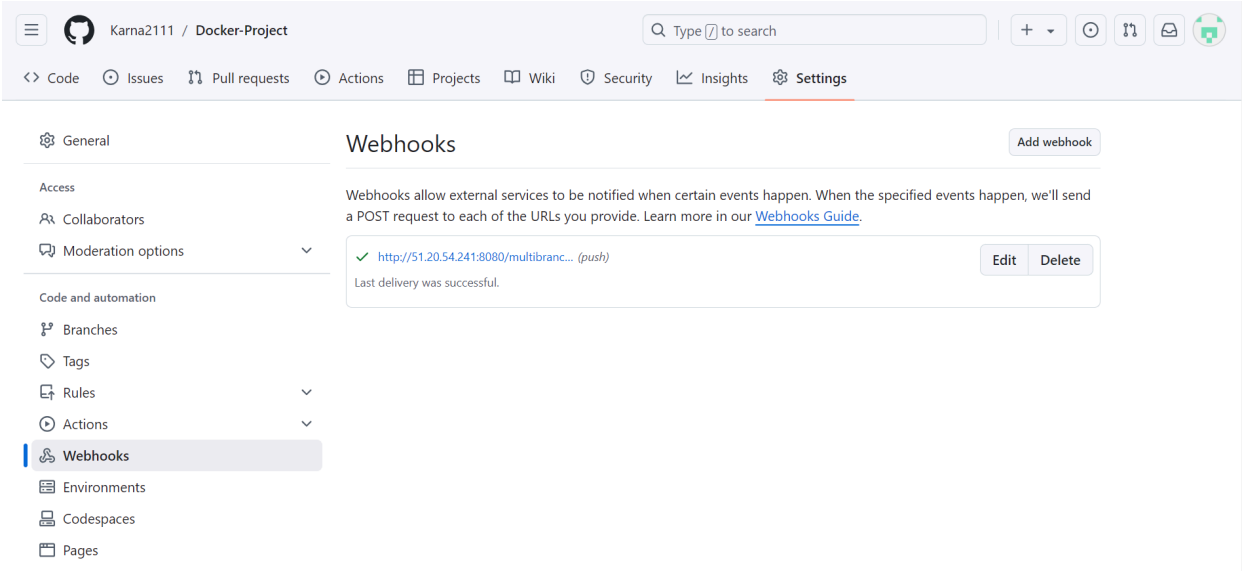
Installing Plugins for automatic trigger



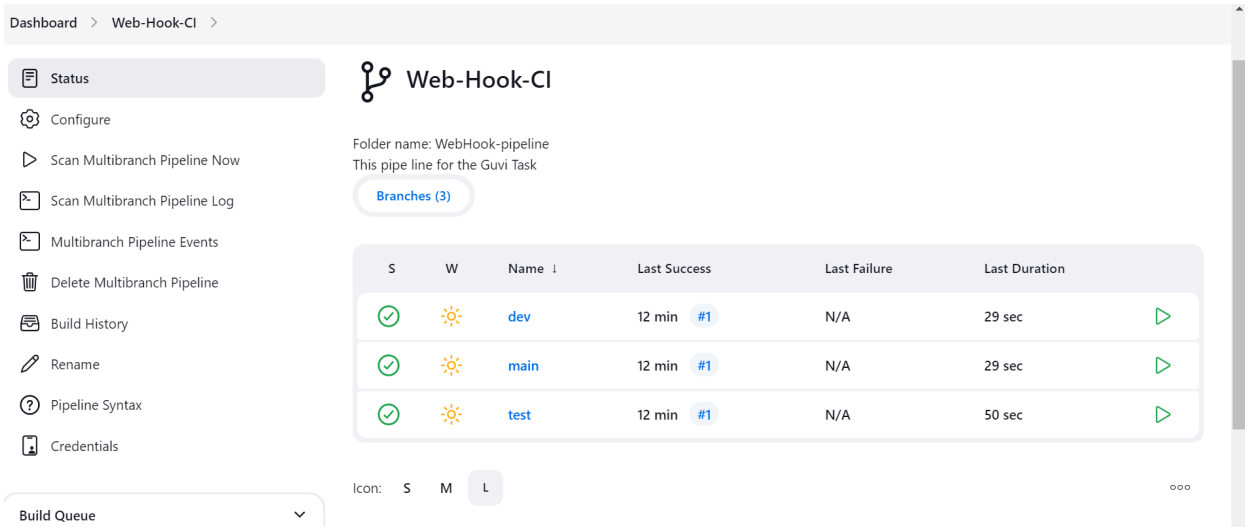
Adding the Webhook and creating the Token to integrate the Github



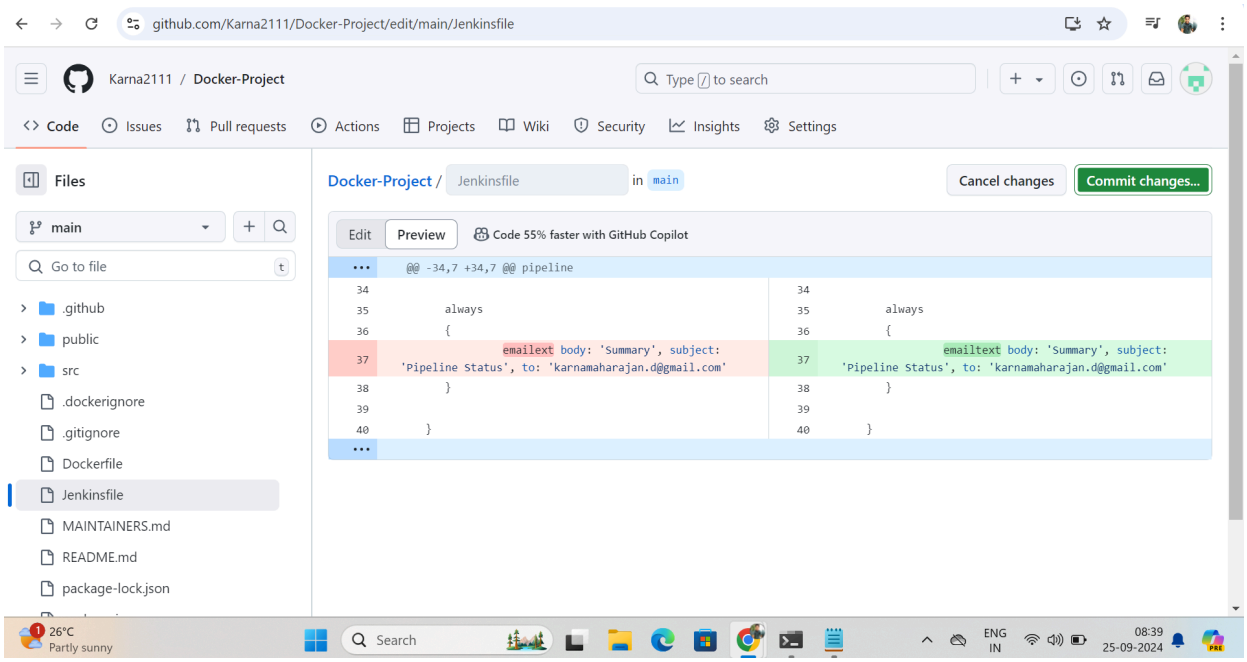
Integrate the token in github



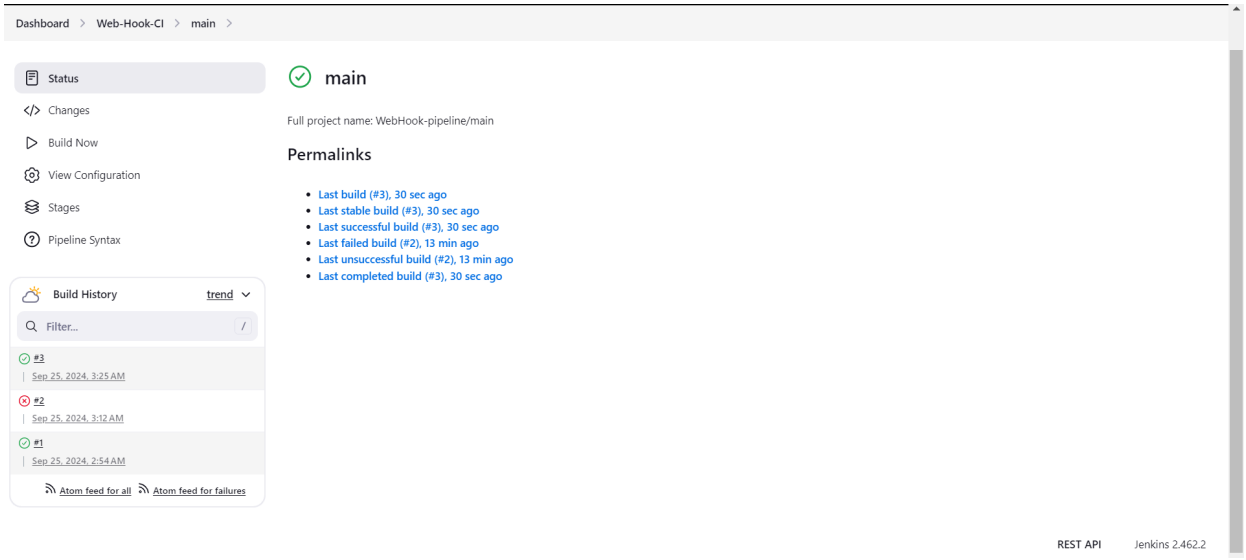
Building the pipeline



Change the code in github for the automatic build



Here the main is triggered and started built automatically.



Output for automatic trigger
